

Powering global Process Industry Leadership in high-value materials & products

Shaping a net-zero & circular future and Europe's strategic autonomy

Competitive Low-Carbon Energy for EIs

Affordable & low-carbon energy at scale, integrated at highest efficiency by Process Industries. *Joint initiative with energy providers.*

High-Value Materials & Products

Solutions best tailored to the needs of European value chains. Cost competitive, differentiated solutions creating greater value for end users.

Clean Industrial Deal Demonstrators

Multiply large-scale industrial demonstrators to scale-up innovations to TRL 8 and first industrial deployment.

Circular Value Chains

Recover and valorise strategic and critical materials through industrial-urban symbiosis. *Joint initiative with waste management sector.*

Carbon Circularity

Develop CO₂ valorisation pathways in Process Industries and related value chains. Close carbon loops and decarbonise European value chains.
